KEY SKILLS

Programming Language

TypeScript, JavaScript,

C++, Java

Technologies / Frameworks

Node.js, Express.js, React.js,

HTML, CSS, Bootstrap

Database

MySQL, MongoDB, Redis

Other Tools

Git, Docker, Kubernetes, AWS,

ASB, Azure Pipelines

EDUCATION

BTech - Computer Science

2019-2023 | 9.12 CGPA

Chameli Devi Group of Institutions,

Indore

Higher Secondary (12th)

2017-2018 | 85.20%

School of Excellence BVM,

Indore

Secondary School (10th)

2015-2016 | 8.60 CGPA

St. Vincent Pallotti School,

Indore

COURSEWORK

Data Structures and Algorithms

Object Oriented Programming

Database Management Systems

Operating System

Internet and Web Technology

ACHIVEMENTS

ICPC 2020 Regionalist

HS rating of **1714** at **CodeChef**

Got **AIR 4** in National

Entrepreneurship challenge

Served as **CP Lead** at CodeChef

Campus Chapter CDGI

EXPERIENCE

Associate Software Developer | Bajaj Finserv Health

July 2023 – Present*

- Contributing to the success of **7 million users** by delivering scalable solutions.
- Engineered backend solutions for **Fitness session booking** such as Gym, Yoga, Zumba, Swimming and Diet Consultation seamlessly integrated with **FITPASS**.
- Successfully implemented **real-time chat** functionality utilizing **Twilio Chat**.
- Engaged in the development of **wellness-centric features**, including a **Diabetic Care Program**, **diet tracker** and **mood tracker**.

Backend Development, Microservices, Node.js, Azure Kubernetes Service, Azure Service Bus, Azure Application Gateway, Azure Pipelines, Caching, Databases

Backend Developer Intern | Bajaj Finserv Health

July 2022 – June 2022 | 12 months

- Contributed to the backend development of **5+ core microservices** such as **CMS**, **Patient Health Records**, **Activity Tracker**, **Strapi**, **Utilities**, etc by developing **APIs**, writing **Scripts**, **Unit Tests**, creating **Azure Pipelines**, doing **POC's** and **bug fixes**.
- Implemented various features in **Step Tracker** such as **Contests** and **Leaderboard**.
- Did data and **Azure Blob migration** of **600k Health Files** from public to private blob, implementing access to files using **Azure Shared Access Signatures (SAS)**.
- Pioneered the creation of the **Health Risk Assessment** Module from inception.
- Optimized **API Performance** to reduce **latency** of APIs to less than **300ms**.

Node.js, Express.js, JavaScript, MongoDB, MySQL, Redis, Azure Pipeline, Docker

SDE Intern – Integrations | Zluri

June 2021 – June 2022 | 12 months

- Successful track record in **dynamic** and **fast-paced** environment of Zluri, having renowned clients such as **Razorpay**, **Gatsby**, **Chargebee**, **MoEngage**, etc.
- Maximized integration efficiency by implementing **parallel processing** using **Argo Workflows** for diverse integrations with abundant data.
- Build connectors for **35+ integrations** such as Salesforce, Google Workspace, Mongo DB, Heroku, GitHub, Gitlab, Azure DevOps, etc.
- Created over **100+ actions** for employee **onboarding** and **offboarding workflows**, enabling streamlined processes for various tasks such as granting or revoking access of users from different resources.

Integrations Development, TypeScript, Node.js, MongoDB, OAuth, S3

PROJECTS

saferU – Empowering Society | [link: GitHub](#)

Node.js – Express.js – Mongo DB – Cloudinary

saferU is a crime reporting mobile application where user can file a complaint see nearby crimes and get safety index of any location, see nearby police station and the contact details, send SOS messages. It has dashboard for headquarter and mobile application for police

RPOLL – CREATE POLL, SHARE AND GET VOTES | [link: GitHub](#)

Node.js – Express.js – Mongo DB – Bootstrap – HTML – CSS - JavaScript

RPOLL is a fun website which can be used to create polls and share the poll link to get votes to know the other's opinion on certain questions
